

Edge sealing has never been easier!

Apply the sealant in a matter of seconds.

## Innovations from Döllken

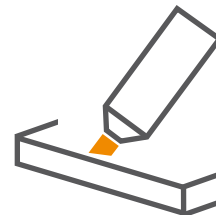

Döllken is constantly developing innovative system solutions. The Döllken AQUA-STOP-PEN is a seamless addition.

With the Döllken AQUA-STOP-PEN joints are:

- waterproof
- dirt-repellent
- steam-resistant

### So easy to use:

Apply a thin layer of the sealant onto the clean joint

Leave to dry for one minute

1 min

The joint is now sealed watertight

Look no further for the

Döllken AQUA-STOP-PEN ensures a watertight seal.

## Waterproof

---

Water and moisture such as in the kitchen and bathroom can no longer damage your wood-composite board thanks to Döllken AQUA-STOP-PEN which seals joints quickly and, above all, reliably. Just apply a thin layer, leave to dry for one minute and the joint is watertight.

Steam too is no longer a problem.

## Steamresistant

---

Fine water vapour can cause adhesive joints to swell – board joints in particular provide the largest area for water to penetrate. But not anymore because Döllken AQUA-STOP-PEN also provides enhanced protection against moisture penetration.

The sealed edge can be cleaned quickly and easily.

## Dirt-repellent

---

No dirt can get into the joint thanks to the tight seal. The treated surface is therefore easy to clean and aesthetically appealing.

Moisture and dirt are a thing of the past.

### Advantages:

---

- Long-lasting joints
- Reliable protection against swelling in joint area
- Easy to use
- Simple cleaning
