By combining minimalist perspectives with SAMET's high technology, world-renowned designers Defne Koz and Marco Susani, created the perfect functionality and sophisticated design for furniture. SAMET Monolift and Duolift, Lift-Up Door Mechanisms, have been designed to occupy minimal space while providing the most elegant look.

Design

On special request from SAMET, Defne Koz and Marco Susani developed MonoLift and DuoLift Lift-Up Door Mechanism that produces striking and aesthetical effects on furniture in two different colors, white and gray. This design was developed to present a delicate design to touch the hearts of users.

Safety and Comfort Combined

SAMET MonoLift and DuoLift Lift-Up Door Mechanism always gives priority to user safety by preventing fast and sharp movements while opening and closing. It ensures a high level of safety with the interim hinge system design to stop finger crushing..

Silent, slow and perfect

With the help of the gradual opening mechanism, SAMET MonoLift and DuoLift Lift-Up Door Mechanism provides the opportunity to place furniture doors, especially high cabinets, at the intended point. In addition, with an anti-collision, soft close mechanism, it improves comfort of use.

MonoLift Lifting Door Systems

Adopting elegant and sophisticated design perspective, Defne Koz and Marco Susani developed MonoLift Lifting Door Systems to provide furniture style and user comfort. The Monolift mechanism, designed in such a way as to occupy minimum space, that ensures functional perfection in all areas.

Easy Installation

Offering adjustability for weight and size during installation, SAMET Monolift Lifting Door Systems reach the balance the furniture needs as well as provide comfortable usage.

DuoLift Lifting Door Systems

DuoLift Lifting Door Systems, a combination of the design experience of Defne Koz and Marco Susani and SAMET's technology, have been specially designed for double door mechanisms.

DuoLift Lifting Door Systems have been developed through innovative solutions enabling much more comfortable use of furniture. Duolift prevents small accidents, such as trapped fingers, with the help of SAMET's high technology.
